EDUCATION

Bachelor of Science in Informatics | University of Washington
Seattle, WA 06/2026

EXPERIENCE

Undergraduate Researcher| University of Washington ISchool |Seattle, WA   06/2024 - Present
- Optimized the layout of the interface, improving the user experience by creating a more accessible and visually appealing platform
- Implemented Chinese localization for tutorials, ensuring accurate translation and maintaining a tidy and readable interface

Research and Development Officer | UWCSSA | Seattle, WA   09/2022 - 12/2023
- Produced and coordinated pre-event teasers, promotional posters, and post-event highlights, driving engagement across 8 on-campus events with a total attendance of 3,000+
- Generated content that achieved a cumulative reach of 20,000+ views, significantly increasing event visibility

PROJECTS

Instagram UI Recreate   03/2024 – Present
Personal Project
- Developed over 200 dynamic CSS components to closely replicate Instagram's interface, emphasizing accessibility through a responsive, screen-reader-friendly layout.
- Implemented advanced JavaScript techniques to ensure seamless interactivity and usability across various devices.

Spotifeel   03/2024 – 06/2024
Course Related Project
- Spearheaded the design and implementation of 90% of the web application's layout and creative components, utilizing Flexbox to achieve a responsive and user-centric interface.
- Integrated personalized song recommendation features, enhancing user engagement and satisfaction.

Planit   09/2022 – 12/2022
Course Related Project
- Developed a meal planner app tailored for college students, featuring a sleek interface and diverse food catalog for seamless meal planning. Simplified and optimized meal selection with intuitive features like recipe customization and grocery list integration.
